Team Lead - [Luminescent Digital](#)

January 2017 – Present

As a Team lead, my job was to take the lead of the development department, and act as the main consultant on all projects, working with the development team to develop the best options for the client.

Senior Software Developer - Luminescent Digital

December 2013 – January 2017

As a senior developer, I was required to work every angle on a project, from working with the client to deliver an accurate specification, building the HTML, JavaScript, and Backend functionality.

Responsibilities:

- Develop high quality code with Zend coding standards.
- Involved in being the technical contact for clients and act as technical consultant.
- Delivery of projects within tight deadlines.

Software Developer - Luminescent Digital

December 2012 – December 2013

Working as one of the core Magento developer in our team, I had to write efficient and maintainable code that would be rolled out to multiple clients over the course of time.

Responsibilities:

- Developing new functionality in line with client's requirements.
- Liaising with clients and understand their requirements.
- Defining the functionality of new modules and estimating the time required to deliver

Junior Software Developer - Luminescent Digital

August 2011 – December 2012

Responsibilities:

- Be a team member of e-commerce projects
- Create custom modules for e-commerce websites.
- Document project and custom functionalities details.
